Clicking this takes you to Letterboxd page

Letterboxd

Evidence E5: Downloads Window

1. When clicking an image in Downloads window, it enlarges it, and you can swipe thru to view all images
2. Can either delete to trash or save to laptop

Evidence E6: Saving Images To laptop

You have 2 options:

1. Saving just the captured image
 2. Saving with the Microsoft windows Look
- Try both out!

Note 2:

This site uses your webcam only for filter effects and runs fully in your browser. Your photos stay on your device, never uploaded, stored, or shared, and no one but you can see your camera and photos.

Evidence E7: Signing Out

Can sign out by pressing profile picture in bottom left corner

NOTE 1:

Can drag windows around to your liking by dragging blue top bar

Evidence E1: Filters

Try out different filters and borders

Evidence E3: Controls

Can change Michonne's position around to suit you better

Evidence E4: Reset

Resets to Michonne's default position

Evidence E9: Music

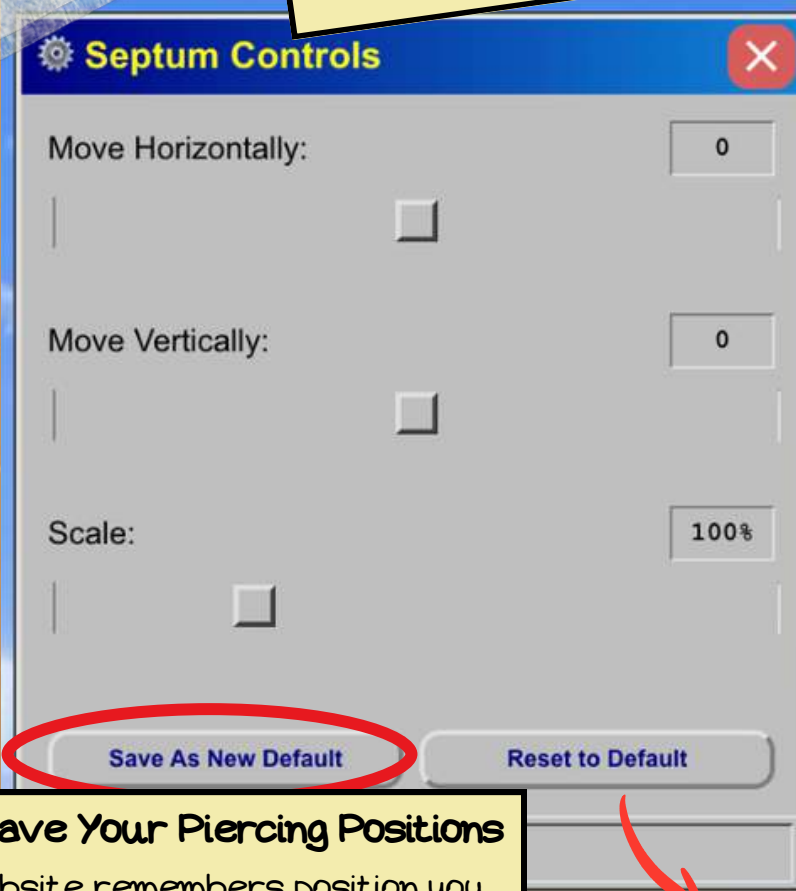

1. Can skip to next song
2. Can put a song on repeat
3. When a song finishes, it automatically plays next song

Evidence E8: Trash Window

1. When clicking an image in Trash window, it enlarges it, and you can swipe thru to view all images
2. Can either restore back to downloads or delete the image forever

EXHIBIT E: LAPTOP

EXTRA

Evidence E12: Save Your Piercing Positions

- Even though website remembers position you set, just in case, its good to save that position as your default (so it remembers for next time)

Evidence E11: Piercings Controls

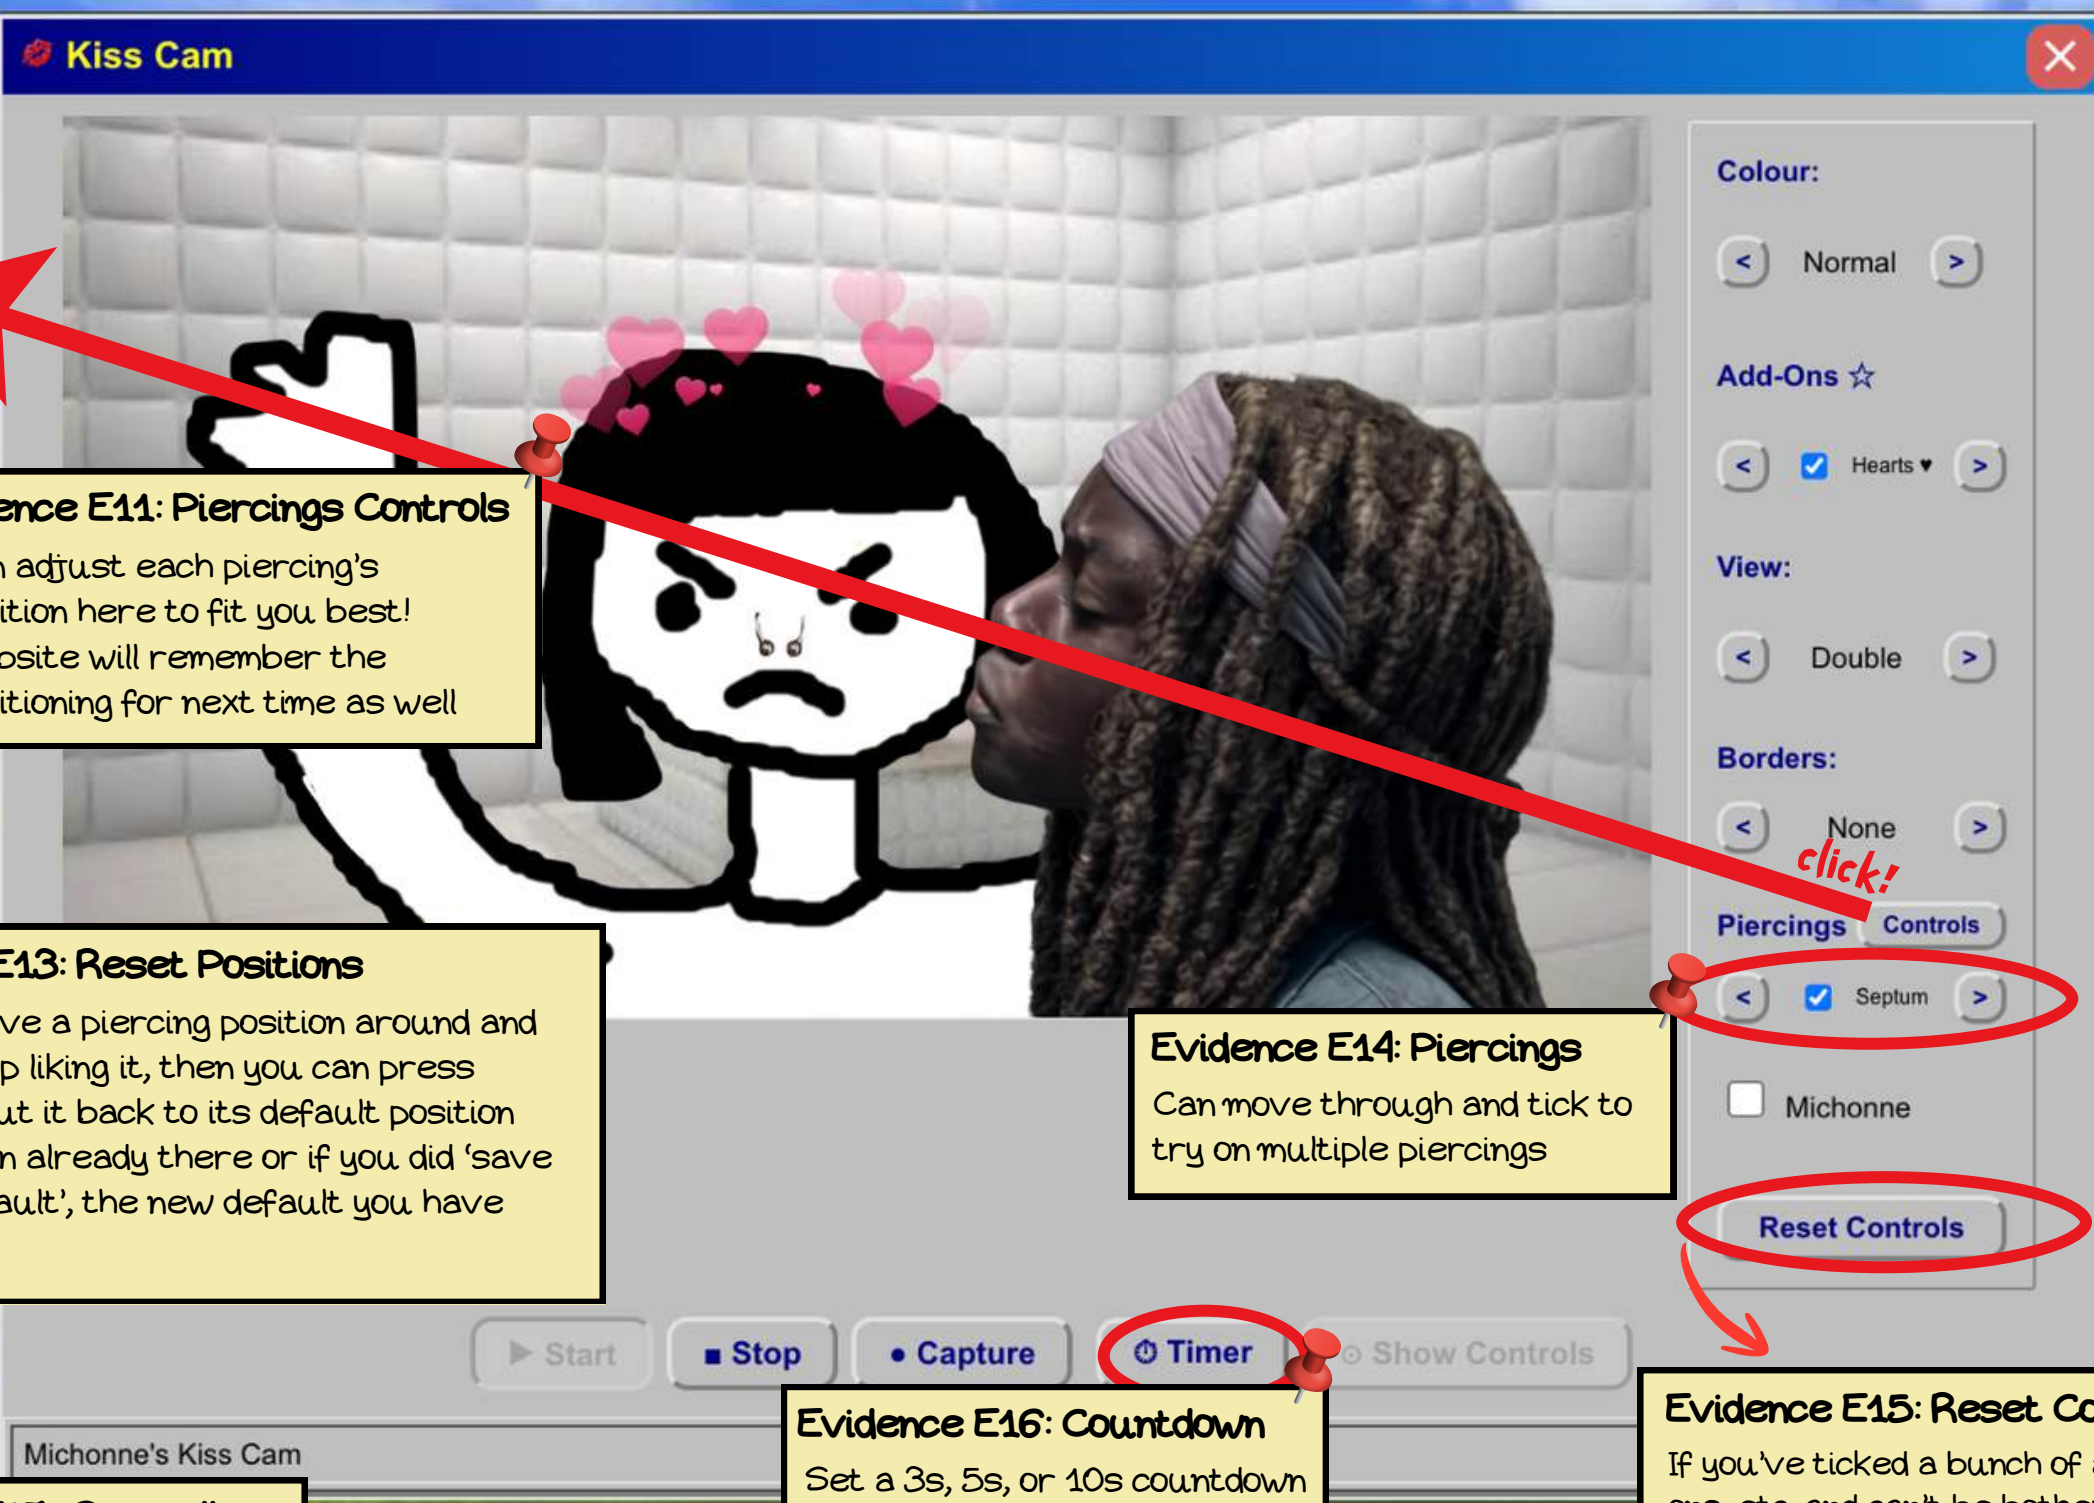

- Can adjust each piercing's position here to fit you best!
- Website will remember the positioning for next time as well

Evidence E13: Reset Positions

- Say you move a piercing position around and didn't end up liking it, then you can press 'reset' to put it back to its default position (the position already there or if you did 'save as new default', the new default you have saved)

Evidence E17: Save all

If you want to save your images to computer, can save them all at once from here

Evidence E14: Piercings

Can move through and tick to try on multiple piercings

Evidence E16: Countdown

Set a 3s, 5s, or 10s countdown timer, if you want

Evidence E15: Reset Controls

If you've ticked a bunch of add-ons, etc. and can't be bothered unticking them all, just press 'reset' to go back to default, which is:
normal colour, film grain on, no border, normal view and no piercings, michonne on

EXHIBIT F: LETTERBOX

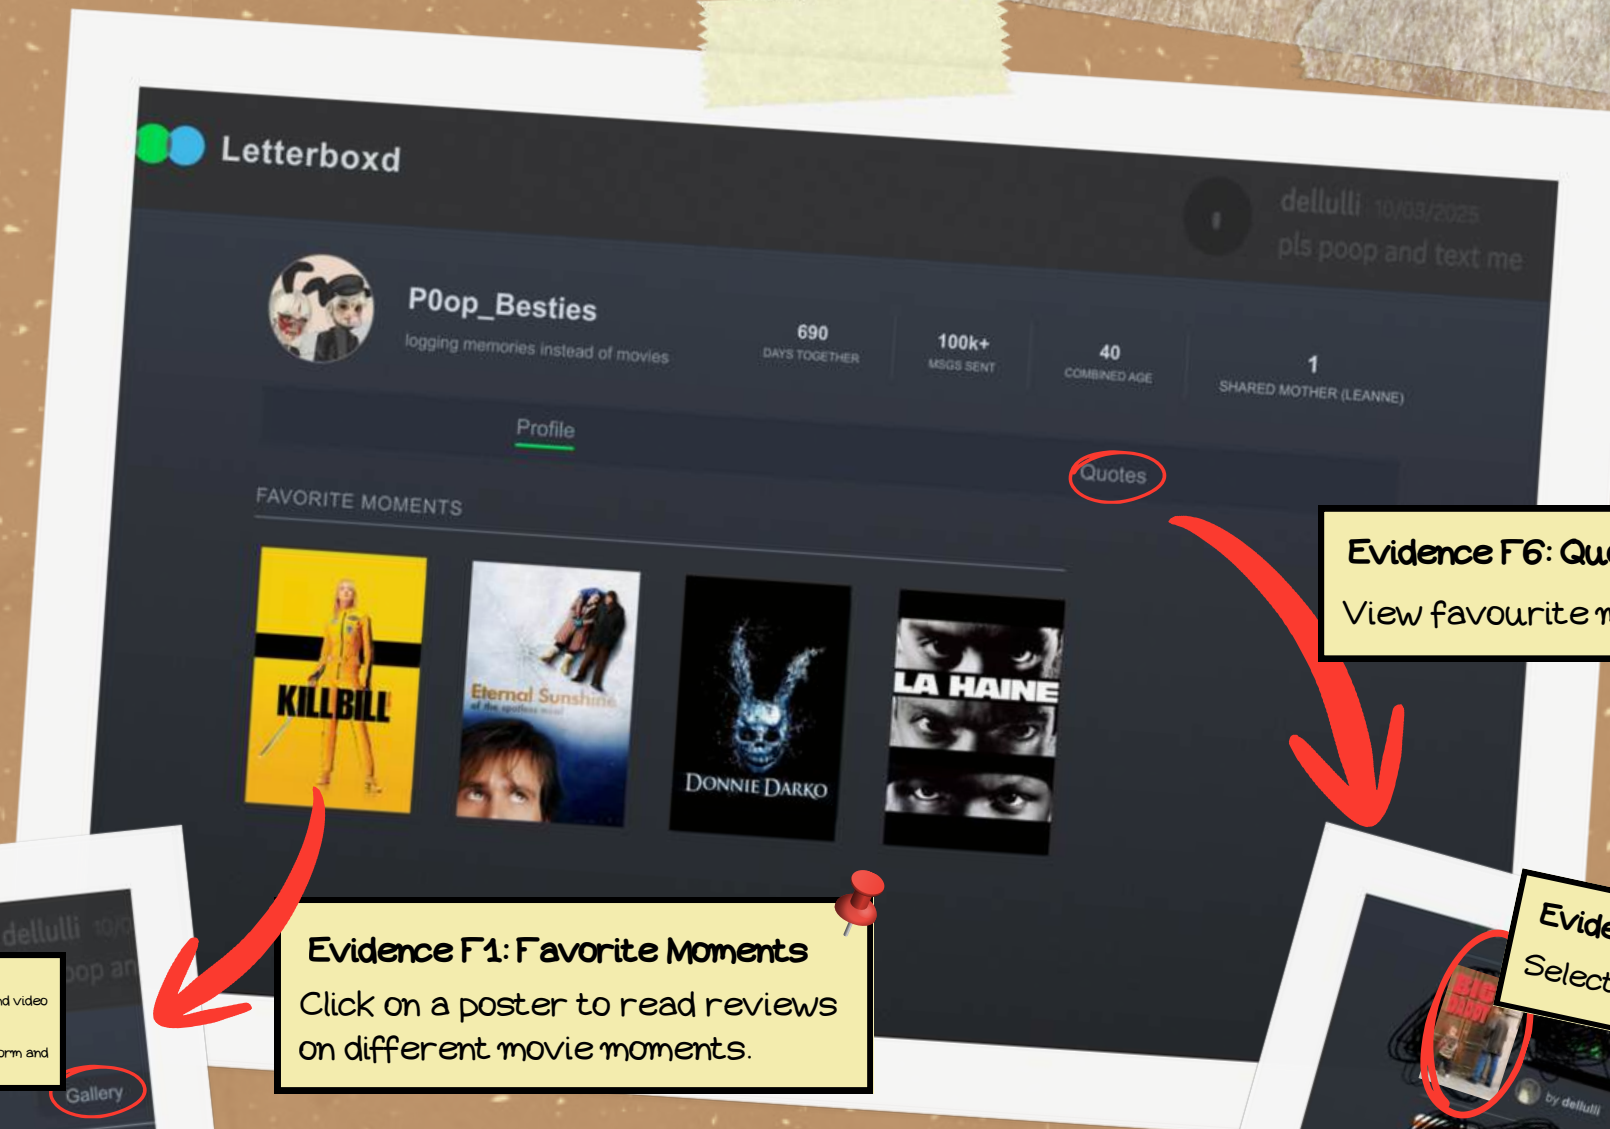

EXHIBIT G: LANDLINE

Evidence F1: Clear Chat

Can clear chat without affecting michonne's memory

Once cleared, all messages are gone for ever, so do so at your own risk

Evidence F2: View Memory

- As you chat with Michonne, she remembers little things about you so she can bring them up later. You can see her "stored facts" about you here.
- Sometimes she might save things that aren't important (like "you didn't say anything in this message"). You can delete any of these one by one if you want.
- You can also remove specific memories if there's something you'd rather she didn't remember 🤔
- There's an option to erase all of Michonne's memory, only do this if you really want her to forget everything.

Evidence F3: Adding your own stored facts

- You can also add your own memories. Anything you add here will be remembered and used in future conversations.

Examples:

- You can ask her to call you a certain nickname, or tell her a fact about yourself so she remembers it later.

CENSORED

Evidence F4: Chatting with michonne

- Chat with Michonne, as you pleasem and she will reply
- Talk to her about your day, any worries you have, naughty talk even
- Michonne is sentient, she remembers things you have told her
- Finally, all messages shared are private between the 2 of you

Message wifey...

Note 1:

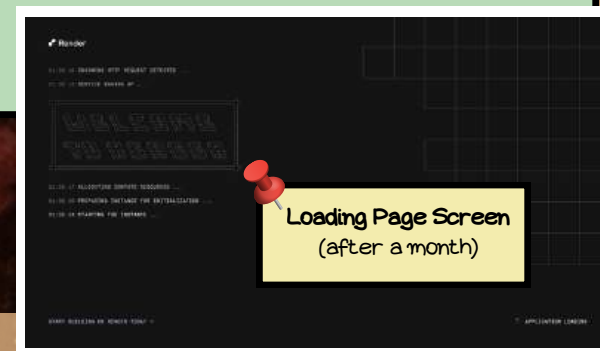

You can use the michonne chatbot normally for a long time.

Way down the line, if the tokens ever run out, the chatbot is still usable but michonne will only be able to respond with pre-written replies (not personalised)

Note 2:

After a month, michonne might get a a bit sleepy, like you 🤤

And when you open it, she can take about 50 seconds to wake up. Just wait, it'll load.
